Renewable & Sustainable Energy Reviews

All Articles for *Renewable & Sustainable Energy Reviews* are published in the journal and online within ScienceDirect

Aims and Scope

Renewable & Sustainable Energy Reviews is the leading international review journal in renewable energy. The journal fulfils an important role for those involved in renewables research, applications and policy, across universities, industry, government, consultancies and independent research facilities. The journal provides a highly readable and valuable addition to the literature, publishing timely reviews across the field. Coverage includes:

- **Resources:** including bioenergy, geothermal energy, hydrogen energy, hydropower, ocean energy, solar energy, wind energy
- **Applications and Services:** including buildings, industry and electricity, transport
- **Policy:** including economic aspects, political aspects, energy planning
- **Environment Impact and Sustainability**
- **Regional and country-level** focused reviews

Renewable & Sustainable Energy Reviews publishes specially commissioned review articles which bring current advances in this ever broadening field together under one cover.

Authors are encouraged to focus their contributions to the journal on one of three type of review:
–Overview: comprehensive, structure coverage on the status of developments across a field, including extensive bibliographies
–Progress: development in a specific focused area over the previous 12–24 months
–Opinion: commentary on ‘hot topic’ areas from leading contributors
